# **Bay County Employees'** Retirement System

# SUMMARY ANNUAL REPORT TO MEMBERS **DECEMBER 31, 2012**

Dear Retirement System Members and Retirants:

The Retirement System, which is managed by the Retirement Board of Trustees, is designed to help you meet your financial needs should you become disabled, retire, or die. The County also supports a retiree health insurance program, which is separate from the Retirement System.

The Retirement Board's fiduciary responsibility to you is to oversee the general administration of the System and invest its assets. Our Board retains professional advisors to assist us in fulfilling these duties.

We have prepared this summary report to give you a brief overview of the Retirement System and how it operates. We hope you will find it useful and informative. However, a summary cannot cover all the details of the System, which is governed by the provisions of the County's Retirement Ordinance and the Retirement Board's official rules and regulations. Additional information about the System, including the Retirement Ordinance and the actuarial valuation, is available in the Finance Office or can be accessed via the County's website.

Respectfully submitted,

# Summary Results of the Actuarial Valuation

Your Retirement System's financial objective is to accumulate the assets necessary to pay the promised benefits in an orderly manner. To accomplish this, contribution rates are established in a manner that is designed to keep those rates approximately level as a percentage of payroll from year to year.

The Board of Trustees of the Bay County Employees' Retirement System provides for payment of the required employer contribution as described in Section 20m of Michigan Public Act No. 728.

To determine an appropriate employer contribution level for the ensuing year and to gauge how the System's funding is meeting this fundamental objective, an independent firm of actuaries and employee benefit consultants, Gabriel, Roeder, Smith & Company, conducts annual actuarial valuations.

These valuations are based on the System's past experience, information about current participation and financial markets, and assumptions concerning the System's future demographic and economic activity. The results of the December 31, 2012 valuation, based on the established funding objective, are summarized below:

Valuation Date
Actuarial Cost Method
Amortization Method
Amortization Periods

December 31, 2012
Individual Entry Age Normal Cost
